INDEX OF AUTHORS

Abrahams, Irving, 263
Ajl, Samuel J., 499
Ashenburg, Norman J., 681

Babcock, Mary C., 135
Bard, R. C., 387
Barnes, L. A., 135
Becker, Maurice E., 717
Bernstein, Jack, 667, 675
Berry, George Packer, 681
Blank, Harvey, 61
Bovarnick, Marianna R., 509
Boyd, William L., 113
Brewer, John H., 237
Brockmann, M. C., 45
Brownlee, Inez, 293
Bunting, Mary I., 241
Burke, G. C., 481

Campbell, J. J. R., 217
Cassel, William A., 185
Cheldelin, Vernon H., 229
Christman, John F., 113
Clark, J. Bennett, 375
Collins, E. B., 69
Colmer, Arthur R., 317
Coriell, Lewis L., 61
Cury, Amadeu, 1

Davis, Dorland J., 413, 427
Davis, Frank, 361
Delwiche, Eugene A., 439
Dienes, L., 755, 765
Donovick, Richard, 667, 675
Doudoroff, Michael, 739
Douglas, H. C., 157
Dufrenoy, Jean, 310
Dulbecco, R., 329

Eagle, Harry, 625
Edwards, P. R., 135
Eisenstark, A., 75
Eisenstark, Roma, 75
Evans, James B., 545

Faber, John E., Jr., 349
Ferguson, William W., 171
Fitting, Charlotte, 277
Fleischman, Ralph, 625
Fluke, Donald J., 449

Foster, J. W., 463
Friddle, S. B., 699

Galbraith, Margaret, 711
Gerhardt, Philipp, 311, 777
Gillen, D. H., 603
Gold, William, 13, 17
Gray, M. L., 443
Griffin, P. J., 699
Griffitts, James J., 427
Guirard, Beverly, 463
Gunsalus, I. C., 387

Haas, Felix, 375
Halvorson, H. O., 645
Hamre, Dorothy, 675
Hansen, P. Arne, 197, 444
Hardwick, W. A., 463
Harrison, Arthur P., Jr., 197, 444
Heagy, Fred C., 367, 603
Hedrick, L. R., 481
Hinkle, Melvin E., 317
Hughes, Kenneth M., 189
Human, Mary L., 551

Jarvis, F. G., 51
Jezeski, J. J., 645
Johnson, M. J., 51
Joslyn, Dwight A., 711

Kamen, Martin D., 693
Kapros, Charles E., 263
Katznelson, H., 153, 471
King, Tsoo E., 229
Kitay, Estelle, 727
Klein, Harold P., 739
Kolb, Robert W., 401
Kupferberg, A. B., 523

Labaw, Louis W., 251
Langford, George C., Jr., 349
Lederberg, Joshua, 211
Levinson, Hillel S., 485
Lichstein, Herman C., 113, 751
Luria, S. E., 551

McClung, Norvel M., 589
Macdonald, D. L., 137
McKercher, D. G., 446
MacLeod, Robert A., 783

McMahon, K. J., 75
McNutt, Walter S., 727
Macy, H., 645
Madoff, Sarabelle, 755, 765
Metzger, William I., 309
Mickelson, M. N., 659
Miller, Judith C., 509
Mitchell, Joyce A., 303
Morris, J. Anthony, 313
Mosley, Vernon M., 251
Mudd, Stuart, 561
Murray, R. G. E., 157, 603
Musselman, Arlyne D., 625

Neill, James M., 263
Nelson, F. E., 69
Niven, C. F., Jr., 545
Norman, M. C., 313

Oginsky, Evelyn L., 29

Pacheco, Genesio, 689
Pansy, Felix, 667
Parmelee, C. E., 69
Pederson, Carl S., 717
Pelczar, Michael J., Jr., 349
Pennington, Derrol, 169, 617
Pisano, M., 357
Pittman, Margaret, 413, 427
Pratt, Robertson, 310

Rake, Geoffrey, 61
Reese, Elwyn T., 485
Roberts, Lucille F., 171
Rogoss, Morrison, 303
Rosenblum, Eugene D., 83

Salvin, S. B., 312
Sandholzer, Leslie A., 681
Scalf, R. E., 45
Scherp, Henry W., 277, 681
Schmidt, Clarence F., 433
Schneiter, Roy, 401
Scott, T. F. McNair, 61
Sears, H. J., 293
Seeley, H. W., 381
Shapse, Joseph B., 309
Siegel, Jack M., 693
Sigurdsson, Björn, 541
Singher, H. O., 523
Siu, Ralph G. H., 485
Sleeper, B. P., 117, 129, 137
Smith, Andrew G., 561, 575
Smith, Patricia H., 29
Snell, Esmond E., 727, 783
Sniesko, S. F., 699
Snyder, John C., 509
Solotorovsky, M., 29
Solowey, Mathilde, 361
Stafseth, H. J., 443
Stanier, R. Y., 117, 129, 137, 527
Stier, T. J. B., 45
Stone, Wilson S., 375
Strehler, Bernard L., 105
Stryker, Gladys, 667
Styles, H., 523

Tamm, Igor, 449
Tashman, Sylvia G., 314
Teas, Howard J., 93
Temple, Kenneth L., 317
Thiago de Mello, Milton, 689
Thorp, Frank, Jr., 443
Tomlinson, Neil, 217
Trussell, Paul C., 217
Tryggvadóttir, Anna G., 541
Tsuchida, M., 129, 137
Tucker, L. A., 777

Uchiyama, John K., 293

VanDemark, P. J., 381, 533
Villela, Gilberto G., 1
Volk, Wesley A., 169

Wachstein, M., 357
Waksman, Selman A., 523
Watson, Dennis W., 13, 17
Weinberger, Howard J., 755, 765
White, John E., 751
Whitlock, Coleman M., Jr., 314
Wilson, J. B., 311, 777
Wilson, P. W., 83
Wyckoff, Ralph W. G., 251
Wyss, Margaret Bedell, 287
Wyss, Orville, 287, 375

INDEX OF SUBJECTS

Acetate requirements of lactic group of streptococci, 60
Acetic acid in medium for *Listeria monocytogenes*, 443
— acid oxidation by *Escherichia coli* and *Aerobacter aerogenes*, 499
Acetoacetic decarboxylase, purification and resolution of, 381
Acid, growth of *Bacillus coagulans* in presence of, 717
— drainage of coal mines, iron-oxidizing bacterium from, 317
Adaptation and oxidation of aromatic compounds, 117, 129
Aerobacter, polysaccharide inhibition of bacteriophagy in, 682
— *aerogenes*, acetic acid oxidation by, 499
Albumin, serum, influence of, on stability of rickettsiae, 509
Aldolase, metallo-, in glucose metabolism of *Clostridium perfringens*, 387
Alkaline solutions and nature of polyhedra, 189
Allescheria boydii Shear, vitamin nutrition of, 1
Amino acid requirement of *Neisseria catarrhalis*, 277
— acids, influence of, on stability of rickettsiae, 509
— acids, single, utilized by brucellae, 777
p-Aminobenzoic acid and growth of *Neurospora* mutant, 105
Anthrax, industrial, 401
Antibiotics, influence of, on *Bacillus larvae*, 471
—, turbidimetric method for assay of, 711
— and development of L forms of typhoid bacilli, 755
Antimetabolites and pantothenic acid in growth of microorganisms, 229
Antisepsis, intestinal, oral aureomycin for, 309
Aromatic compounds, bacterial oxidation of, 117, 129, 137, 527
Ashbya gossypii, metabolism of glucose by, 659
Aspartic acid deaminase, effect of biocytin and yeast extract on, 113
Aspergillus niger, production of citric acid by, 217
Assay of antibiotics, turbidimetric method for, 711
Athiorhodaceae, 157, 169, 693
Aureomycin, *in vitro* sensitivity tests of, 314
—, oral, for intestinal antisepsis, 309
Azotobacter, cytological study of, 75
—, mutants of, that do not fix nitrogen, 287

Bacillus anthracis, effect of methyl bromide on, 401
— *coagulans*, physiological characters of, 717
— *larvae*, complex organic media for growth and sporulation of, 463
— *larvae*, influence of antibiotics and sulfa drugs on, 471
— *pulvifaciens* (n. sp.), 153
— *subtilis*, threonine- and methionine-requiring mutants of, 93
— *thermoacidurans*, physiological characters of, 717
Bacteria, effect of formaldehyde on reactions of, with basic dyes, 617
—, effect of perchloric acid on, 185
— in cecal feces of turkeys, 197
Bacteriophage, chromatin staining during infection with, 551
—, photoreactivation of, 329
— and development of L forms of typhoid bacilli, 755
— of *Clostridium madisonii*, 13
— (T2), cytological changes in *Escherichia coli* infected with, 603
— (T2), inhibition of *Escherichia coli* B by, 367
Bacteriophagy, inhibition of, by bacterial and nonbacterial polysaccharides, 681
Bacterium anitratum, bacteriological and serological study of, 171
Biocytin and aspartic acid deaminase, 113
Biotin and aspartic acid deaminase, 113
— and growth of *Allescheria boydii* Shear, 1
— function in succinic acid decarboxylation by *Propionibacterium pentosaceum*, 439
Blackhead of turkeys, 197
Borrelia anserina, propagation of, in embryonated eggs, 446
Brucella abortus, replacement of required carbon dioxide in, 311
— *suis*, urease test for differentiation of, 689

Brucellae, utilization of single amino acids by, 777

Carbohydrates, influence of, on stability of rickettsiae, 509
—, inhibition of bacteriophagy by, 681
—, metabolism of, by *Ashbya gossypii*, 659
—, oxidation of, in *Escherichia coli* and *Aerobacter aerogenes*, 499
— and color variations in *Serratia marcescens*, 247
Carbon dioxide, replacement of, in *Brucella abortus*, 311
Catechol, oxidation of, by *Pseudomonas fluorescens*, 117, 129, 137
Cecal feces of turkeys, bacterial flora of, 197
— feces of turkeys, motile *Lactobacillus* from, 444
Cellulose derivatives, soluble, biological degradation of, 485
Cepharantine, changes induced in *Escherichia coli* by, 310
Chemotherapy of experimental tuberculosis, 667, 675
Chlamydobacteriales, 317
Chromatin, staining of, 575
—, staining of, in phage-infected bacteria, 551
— in *Escherichia coli* infected with phage T2, 603
"Chromatinic bodies," demonstration of, with perchloric acid, 187
Citric acid, production of, by *Aspergillus niger*, 217
Clostridium, fixation of hydrogen and nitrogen by, 83
— *madisonii*, acetoacetic decarboxylase from, 381
— *madisonii*, bacteriophages of, 13
— *perfringens*, glucose metabolism of, and existence of metallo-aldolase, 387
Coal mines, bituminous, iron-oxidizing bacterium from, 317
Colonial variation, induced, in lactobacilli, 303
Color variation in *Serratia marcescens*, effect of surface-active agents on, 241
Conjunctivitis, Koch-Weeks bacillus isolated from cases of, 413
Copper, influence on citric acid production by *Aspergillus niger*, 217
Cryptococcus neoformans, comparison of immunogenicity of strains of, 263
Cytology, bacterial, use of perchloric acid in, 185

Decarboxylation of succinic acid by *Propionibacterium pentosaceum*, 439
Desoxyribosides as growth factors for lactic acid bacteria, 727
Detergents, *see* Surface-active agents
2,4-Dinitrophenol, inhibition of *Escherichia coli* B by, 367
Diplococci, anaerobic gram-negative, in human mouth, 349
Drosophila, *see* Fruit flies, Hawaiian
Dyes, basic, effect of formaldehyde on reaction of bacteria with, 617

Eggs, embryonated, propagation of *Borrelia anserina* in, 446
Electron microscopy for bacterial nuclei, 561, 575
— microscopy of herpes simplex, 61
Enterotoxigenic staphylococci, comparative study of, 545
Enzymes, acetoacetic decarboxylase, 381
—, oxidation of protocatechuic acid by, 129, 137, 527
— of *Pseudomonas putrefaciens* for glucose utilization, 727
Escherichia coli, acetic acid oxidation by, 499
— *coli*, changes induced by cepharantine in, 310
— *coli*, cytological changes produced by phage T2 infection in, 603
— *coli*, disappearance of folic acid from, 751
— *coli*, effect of 2,4-dinitrophenol and phage T2 on, 367
— *coli*, genetic recombination in, 211, 375
— *coli*, phage-infected, staining of chromatin in, 551
— *coli*, photoreactivation of bacteriophages of, 329
— *coli*, radioactive studies of phosphorus metabolism of, 251
— *coli* and streptomycin, 39
— *coli* in human intestinal tract, 293

Fats, action of microorganisms on, 645
Fatty acid oxidation by *Mycobacterium tuberculosis*, effect of streptomycin on, 29
Ferrets, isolation of *Listeria monocytogenes* from, 313

Folic acid, disappearance of, from bacterial cells, 751
Food-poisoning staphylococci, comparative study of, 545
Formaldehyde, effect of, on reaction of bacteria with basic dyes, 617
Foulbrood, American, of the honeybee, 471
Fruit flies, Hawaiian, riboflavin production by yeasts from, 481

Genetic recombinations, selection of, 211
— recombinations in *Escherichia coli*, stimulation of, 375
Glucose metabolism of *Ashbya gossypii*, 659
— metabolism of *Clostridium perfringens*, 387
— utilization, mutation of *Pseudomonas putrefaciens* to, 739
Glycerol oxidation by *Streptococcus faecalis*, vitamin requirements for, 533
Growth and pantothenic acid, 229
— and sporulation of *Bacillus larvae*, complex organic media for, 463
— factors for lactic acid bacteria, 727
— inhibition of *Escherichia coli* by 2,4-dinitrophenol and phage T2, 367
— inhibitors, bacterial, and selection of genetic recombinations, 211
— requirements of *Allescheria boydii* Shear, 1
— requirements of *Bacillus coagulans*, 717
— requirements of brucellae, 777
— requirements of *Hemophilus piscium* n. sp., 699
— requirements of lactic acid bacteria, inorganic, 783
—requirements of *Salmonella*, organic, 361

Heat, resistance of bacterial spores to, 433
Hemagglutination by influenza virus type A, effect of monochromatic ultraviolet radiation on, 449
— of Koch-Weeks bacillus, 427
Hemophilus aegyptius, *see* Koch-Weeks bacillus
— *influenzae*, 413, 427
— *piscium* n. sp. from ulcer disease of trout, 699
Herpes simplex, electron microscopy of, 61
Histoplasma capsulatum, yeastlike phase of, 312
Homoserine and *Bacillus subtilis*, 93
Honeybee, American foulbrood of, 471
— larvae and *Bacillus pulvifaciens* (n. sp.), 153
Hydrogen, molecular, fixation by *Clostridium* of, 83
Hydrolysis, cellulose, mechanism of, 485

Immunization with heat-killed *Mycobacterium paratuberculosis* in mineral oil, 541
Immunogenicity of *Cryptococcus neoformans*, 263
Infectious enterohepatitis (blackhead) of turkeys, 197
Influenza virus type A, effect of monochromatic ultraviolet radiation on, 449
Insects, nature of polyhedra in, 189
Intestinal antisepsis, oral aureomycin for, 309
— tract, *Escherichia coli* strains in, 293
Ion antagonism and inorganic nutrition of lactic acid bacteria, 783
Iron, influence of, on citric acid production by *Aspergillus niger*, 217
— in glucose metabolism of *Clostridium perfringens*, 387
— -oxidizing bacterium from bituminous coal mines, 317
Isopropanol, oxidation of, by *Rhodopseudomonas gelatinosa*, 603

β-Ketoadipic acid, oxidation of protocatechuic acid to, by *Pseudomonas fluorescens*, 117, 120, 137, 527
Klebsiella pneumoniae, polysaccharide inhibition of bacteriophagy in, 681
Koch-Weeks bacillus (*Hemophilus aegyptius*), hemagglutination of, 427
— bacillus (*Hemophilus aegyptius*), identification of, 413

L forms of *Salmonella* and *Shigella*, isolation and properties of, 765
— forms of typhoid bacilli, conditions of transformation to, 755
Lactic acid bacteria, desoxyribosides and vitamin B_{12} for growth of, 727
— acid bacteria, ion antagonism and inorganic nutrition of, 783
Lactobacilli, induced colonial variation in, 303
Lactobacillus, desoxyribosides and vitamin B_{12} for growth of, 727

Lactobacillus ion antagonism and inorganic nutrition of, 783
— *plantarum* var. *mobilis* from cecal feces of turkeys, 444
Larvae, honeybee, and *Bacillus pulvifaciens* (n. sp.), 153
Lead salts and staining for polar bodies, 357
Leuconostoc mesenteroides, ion antagonism and inorganic nutrition of, 783
Light microscopy for bacterial nuclei, 561, 575
Lipid substrates and oxygen uptake by bacteria, 645
Listeria monocytogenes, isolation of, from ferrets, 313
— *monocytogenes*, selective medium for, 443
Lysis of *Clostridium madisonii*, 13

Manganese, influence of, on citric acid production by *Aspergillus niger*, 217
— $^{++}$ ion and growth of lactic acid bacteria, 783
Media, chemically defined, for growth of brucellae, 777
—, complex organic, for *Bacillus larvae*, 463
—, fluid, for *Histoplasma capsulatum*, 312
—, organic, for *Salmonella*, 362
— for *Bacillus coagulans*, 717
— for biotin function in succinic acid decarboxylation by *Propionibacterium pentosaceum*, 439
— for citric acid production by *Aspergillus niger*, 220
— for growth inhibition of *Escherichia coli*, 367
— for growth of lactic acid bacteria, 727
— for *Hemophilus piscium* n. sp., 699
— for inorganic nutrition of lactic acid bacteria, 783
— for iron-oxidizing bacterium from coal mines, 318
— for isolation of *Listeria monocytogenes*, 443
— for metabolism of *Neisseria catarrhalis*, 277
— for photosynthetic bacteria, 157
— for *Streptococcus lactis* and *Streptococcus cremoris*, 69
Metabolism, glucose, of *Ashbya gossypii*, 659
—, phosphorus, of *Escherichia coli*, 251
— of *Neisseria catarrhalis*, 277
Metabolism of photosynthetic bacteria, 693
— of *Salmonella*, 361
Methionine and growth of *Neurospora* mutant, 105
— -requiring mutants of *Bacillus subtilis*, 93
Methyl bromide, germicidal and sporicidal effect of, on *Bacillus anthracis*, 401
Microorganisms, ability of, to utilize soluble glucose derivatives, 485
—, action of fats on, 645
Microscopy, *see* Electron microscopy *and* Light microscopy
Mineral nutrition of lactic acid bacteria, 783
— nutrition of *Penicillium chrysogenum* Q176, 51
— oil, immunization with heat-killed *Mycobacterium paratuberculosis* in, 541
Mouse, thiosemicarbazones and analogues in experimental tuberculosis in, 675
Mutation and genetic recombinations, 211
— and surface-active agents, in *Serratia marcescens*, 241
— in *Azotobacter*, and nitrogen fixation, 287
— in *Escherichia coli*, 375
— induced in *Escherichia coli* by cepharantine, 310
— of *Pseudomonas putrefaciens*, to glucose utilization, 739
Mycobacterium paratuberculosis, heat-killed, immunization with, in mineral oil, 541
— *tuberculosis*, effect of thiosemicarbazides, thiosemicarbazones, and related compounds on, 667, 675
— *tuberculosis* and streptomycin, 29

Neisseria, 349
— *catarrhalis*, metabolism of, 277
Neurospora, effect of *para*-aminobenzoic acid and methionine on, 105
Nitrogen, sources of, for brucellae, 777
— fixation and mutants of *Azotobacter*, 287
— fixation by *Clostridium*, 83
Nocardia, cytological studies of, 589
Nuclei, electron and light microscopy of, 561, 575
Nucleic acids and growth of *Escherichia coli*, 251
Nutrition, *see* Growth requirements

Oleate requirements of lactic group of streptococci, 69
Organism B5W, see *Bacterium anitratum*
Oxidation, acetic acid, by *Escherichia coli* and *Aerobacter aerogenes*, 499

Oxidation, bacterial, of aromatic compounds, 117, 129, 137, 527
—, fatty acid, by *Mycobacterium tuberculosis*, 29
—, glycerol, by *Streptococcus faecalis*, vitamin requirements for, 533
Oxygen uptake by bacteria in the presence of lipid substrates, 645

Pantothenic acid conjugate and antimetabolites in growth of microorganisms, 229
Para-aminobenzoic acid, *see* Aminobenzoic acid
Penicillin, *in vitro* and *in vivo*, for streptococci, pneumococci, and *Treponema pallidum*, 625
— and development of L forms of typhoid bacilli, 755
— and isolation of L forms of *Salmonella* and *Shigella*, 765
— production, 51
Penicillium chrysogenum Q176, mineral nutrition of, 51
Perchloric acid and bacterial cytology, 185
Petri dish covers with absorptive disks, 237
pH and growth of *Bacillus coagulans*, 717
— and lysis of *Clostridium madisonii*, 13
Phage, *see* Bacteriophage
Phosphorus metabolism of *Escherichia coli*, radioactive studies of, 251
Photoreactivation of bacteriophages with ultraviolet radiation, 329
Photosynthetic bacteria, metabolism of, 603
— bacteria, pigments of, 169
— bacteria, reproductive mechanism of, 157
Pigments of *Rhodomicrobium vannielii*, 169
Pneumococci, effective concentrations of penicillin for, 625
Polar bodies, new stain for, 357
Polyhedra, demonstration of nature of, with alkaline solutions, 189
Polyphenolic intermediates in bacterial oxidation of aromatic compounds, 117, 129, 137, 527
Polysaccharides, inhibition of bacteriophagy by, 681
Potassium tellurite in medium for *Listeria monocytogenes*, 443
Proactinomyces (*Nocardia*) *ruber*, 589
Proteins, influence of, on stability of rickettsiae, 509
Protocatechuic acid, enzymatic degradation of, 117, 129, 137, 527
Pseudomonas fluorescens, oxidation of aromatic compounds by, 117, 129, 137, 527
— *putrefaciens*, mutation of, to glucose utilization, 739

Radioactive studies, phosphorus metabolism of *Escherichia coli*, 251
Rhodomicrobium vannielii, pigments of, 169
— *vannielii*, reproductive mechanism of, 157
Rhodopseudomonas gelatinosa, metabolism of isopropanol by, 603
Riboflavin, production of, by yeasts from Hawaiian fruit flies, 481
Rickettsiae, media for, 509
Robinow stain for cytological study of *Azotobacter*, 75

Salmonella, properties of L forms isolated from, 765
— *anatum*, utilization of organic compounds by, 361
— *oranienburg*, utilization of organic compounds by, 361
— *paratyphi*, phase 2 of, 135
— *pullorum*, utilization of organic compounds by, 361
— *typhosa*, conditions of transformation to L forms of, 755
Salts, influence of, on stability of rickettsiae, 509
Sarcina lutea, action of streptocin on, 525
Serratia marcescens, effect of surface-active agents on color variation in, 241
Serum and development of L forms of typhoid bacilli, 755
Sheep, immunization of, with heat-killed *Mycobacterium paratuberculosis* in mineral oil, 541
Shigella, isolation of L forms from, 765
Sodium acetate and growth of streptococci, 69
— azide in medium for *Listeria monocytogenes*, 443
Sorbitan monooleate and growth of streptococci, 69
Spores, bacterial, thermal resistance of, 433
Sporulation and growth of *Bacillus larvae*, complex organic media for, 463
Staining of chromatin in phage-infected bacteria, 551
— technique for nuclear chromatin, 575
— technique for polar bodies, 357
Staphylococci, food-poisoning, comparative study of, 545

Streptocin, production of, by *Streptomyces griseus*, 523
Streptococci, effective concentrations of penicillin for, 625
Streptococcus cremoris, chemically defined medium for, 69
— *faecalis*, vitamin requirements for glycerol oxidation by, 533
— *lactis*, chemically defined medium for, 69
Streptomyces griseus, production of streptocin by, 523
Streptomycin and fatty acid oxidation by *Mycobacterium tuberculosis*, 29
Succinic acid decarboxylation by *Propionibacterium pentosaceum*, 439
Sugars, *see* Carbohydrates
Sulfa drugs, influence on *Bacillus larvae*, 471
Sulfanilamide and PABA and methionine, 105
Surface-active agents, effect on color variation of *Serratia marcescens*, 241

Thermal resistance, *see* Heat
Thiobacillus, 320
Thiorhodaceae, 169
Thiosemicarbazides, *in vitro* activity of, on *Mycobacterium tuberculosis*, 667
Thiosemicarbazones, effect on *Mycobacterium tuberculosis*, 667, 675
Threonine-requiring mutants of *Bacillus subtilis*, 93
Tomato juice, growth of *Bacillus coagulans* in, 717
Torula histolytica, see *Cryptococcus neoformans*
Treponema pallidum, effective concentrations of penicillin for, 625
Trout, *Hemophilus piscium* n. sp. isolated from ulcer disease of, 699
Tuberculosis, experimental chemotherapy of, 667, 675
Turbidimetric method for assay of antibiotics, 711
Turkeys, healthy, bacterial flora of cecal feces of, 197
—, motile *Lactobacillus* from cecal feces of, 444
Typhoid bacilli, conditions of transformation to L forms of, 755
— bacilli, properties and isolation of L forms of, 765

Ulcer disease of trout, *Hemophilus piscium* n. sp. isolated from, 699
Ultraviolet radiation, monochromatic, effect on influenza virus type A, 449
— radiation, photoreactivation of bacteriophages inactivated with, 329
— radiation and genetic recombination in *Escherichia coli*, 375
Urease test for differentiation of *Brucella suis*, 689

Veillonella, 349
Vesicular nuclei, 561
Virus, *see* Bacteriophage
—, influenza, *see* Influenza virus
Vitamin B_{12} as growth factor for lactic acid bacteria, 727
— nutrition of *Allescheria boydii* Shear, 1
Vitamins required for glycerol oxidation by *Streptococcus faecalis*, 533

Yeast, apparatus for anaerobic cultivation of, 45
— extract and aspartic acid deaminase, 113
Yeasts from Hawaiian fruit flies, riboflavin production by, 481
Yolk sac technique in propagation of *Borrelia anserina* in embryonated eggs, 446

Zinc, influence of, on citric acid production by *Aspergillus niger*, 217
— $^{++}$ ion and growth of lactic acid bacteria, 783

JOURNAL

OF

BACTERIOLOGY

VOLUME 59

BALTIMORE, MD.
1950

CONTENTS

No. 1, JANUARY, 1950

Studies on the Vitamin Nutrition of *Alleseheria boydii* Shear. Gilberto G. Villela and Amadeu Cury 1

Studies on the Bacteriophage Infection Cycle. I. A Lytic Activity Assay for Bacteriophages of *Clostridium madisonii*. William Gold and Dennis W. Watson 13

Studies on the Bacteriophage Infection Cycle. II. Phage Infection and Lysis of *Clostridium madisonii*, a Function of pH. William Gold and Dennis W. Watson 17

The Action of Streptomycin. IV. Fatty Acid Oxidation by *Mycobacterium tuberculosis*, Avian Type. Evelyn L. Oginsky, Patricia H. Smith, and M. Solotorovsky 29

An All-Glass Apparatus for the Continuous Cultivation of Yeast under Anaerobic Conditions. T. J. B. Stier, R. E. Scalf, and M. C. Brockmann 45

The Mineral Nutrition of *Penicillium chrysogenum* Q176. F. G. Jarvis and M. J. Johnson 51

Electron Microscopy of Herpes Simplex. Lewis L. Coriell, Geoffrey Rake, Harvey Blank, and T. F. McNair Scott 61

Acetate and Oleate Requirements of the Lactic Group of Streptococci. E. B. Collins, F. E. Nelson, and C. E. Parmelee 69

A Cytological Study of a Pleomorphic Strain of *Azotobacter* with the Electron and Phase Microscopes and the Robinow Nuclear-staining Technique. A. Eisenstark, K. J. McMahon, and Roma Eisenstark 75

Molecular Hydrogen and Nitrogen Fixation by *Clostridium*. Eugene D. Rosenblum and P. W. Wilson 83

Mutants of *Bacillus subtilis* That Require Threonine or Threonine plus Methionine. Howard J. Teas 93

The Replacement of *para*-Aminobenzoic Acid by Methionine in the Growth of a *Neurospora* Mutant. Bernard L. Strehler 105

The Comparative Effects of Biocytin and a Yeast Extract Concentrate on Aspartic Acid Deaminase. Herman C. Lichstein, John F. Christman, and William L. Boyd ... 113

The Bacterial Oxidation of Aromatic Compounds. I. Adaptive Patterns with Respect to Polyphenolic Compounds. B. P. Sleeper and R. Y. Stanier 117

The Bacterial Oxidation of Aromatic Compounds. II. The Preparation of Enzymatically Active Dried Cells and the Influence Thereon of Prior Patterns of Adaptation. B. P. Sleeper, M. Tsuchida, and R. Y. Stanier 129

Note:

The Natural Occurrence of Phase 2 of *Salmonella paratyphi* A. P. R. Edwards, L. A. Barnes, and Mary C. Babcock 135

No. 2, FEBRUARY, 1950

The Bacterial Oxidation of Aromatic Compounds. III. The Enzymatic Oxidation of Catechol and Protocatechuic Acid to β-Ketoadipic Acid. R. Y. Stanier, B. P. Sleeper, M. Tsuchida, and D. L. Macdonald 137

Bacillus pulvifaciens (n. sp.), an Organism Associated with Powdery Scale of Honeybee Larvae. H. Katznelson 153

The Reproductive Mechanism of *Rhodomicrobium vannielii* and the Accompanying Nuclear Changes. R. G. E. Murray and H. C. Douglas 157

The Pigments of the Photosynthetic Bacterium *Rhodomicrobium vannielii*. Wesley A. Volk and Derrol Pennington 169

A Bacteriological and Serological Study of Organism B5W (*Bacterium anitratum*). William W. Ferguson and Lucille F. Roberts 171

The Use of Perchloric Acid in Bacterial Cytology. William A. Cassel 185

A Demonstration of the Nature of Polyhedra Using Alkaline Solutions. Kenneth M. Hughes 189
The Bacterial Flora of the Cecal Feces of Healthy Turkeys. Arthur P. Harrison, Jr., and P. Arne Hansen 197
The Selection of Genetic Recombinations with Bacterial Growth Inhibitors. Joshua Lederberg 211
The Influence of Zinc, Iron, Copper, and Manganese on the Production of Citric Acid by *Aspergillus niger*. Neil Tomlinson, J. J. R. Campbell, and Paul C. Trussell 217
Pantothenic Acid Studies. VIII. Growth of Microorganisms and Counteraction of Antimetabolites with a Pantothenic Acid Conjugate (PAC). Tsoo E. King and Vernon H. Cheldelin 229
The Utility of Metal Petri Dish Covers with Absorptive Disks. John H. Brewer 237
The Effect of Surface-active Agents on Color Variation in Aging Populations of *Serratia marcescens*. Mary I. Bunting 241
Radioactive Studies of the Phosphorus Metabolism of *Escherichia coli*. Louis W. Labaw, Vernon M. Mosley, and Ralph W. G. Wyckoff 251
A Comparison of the Immunogenicity of Weakly Encapsulated and of Strongly Encapsulated Strains of *Cryptococcus neoformans* (*Torula histolytica*). James M. Neill, Irving Abrahams, and Charles E. Kapros 263
Observations on the Metabolism of a Strain of *Neisseria catarrhalis*. Charlotte Fitting and Henry W. Scherp 277
Mutants of *Azotobacter* That Do Not Fix Nitrogen. Orville Wyss and Margaret Bedell Wyss 287
Persistence of Individual Strain of *Escherichia coli* in the Intestinal Tract of Man. H. J. Sears, Inez Brownlee, and John K. Uchiyama 293
Induced Colonial Variation of a Total Population among Certain Lactobacilli. Morrison Rogosa and Joyce A. Mitchell 303
Notes:
Evaluation of Oral Aureomycin for Intestinal Antisepsis. William I. Metzger and Joseph B. Shapse 309
Changes Induced in *Escherichia coli* by Cepharantine. Jean Dufrenoy and Robertson Pratt 310
Attempts to Replace the Added Carbon Dioxide Required by Some Strains of *Brucella abortus*. Philipp Gerhardt and J. B. Wilson 311
Growth of the Yeastlike Phase of *Histoplasm capsulatum* in a Fluid Medium. S. B. Salvin 312
The Isolation of *Listeria monocytogenes* from Ferrets. J. Anthony Morris and M. C. Norman 313
A Report on Further *in Vitro* Aureomycin Sensitivity Tests. Coleman M. Whitlock, Jr., and Sylvia G. Tashman 314

No. 3, MARCH, 1950

An Iron-oxidizing Bacterium from the Acid Drainage of Some Bituminous Coal Mines. Arthur R. Colmer, Kenneth L. Temple, and Melvin E. Hinkle 317
Experiments on Photoreactivation of Bacteriophages Inactivated with Ultraviolet Radiation. R. Dulbecco 329
The Occurrence of Anaerobic Gram-negative Diplococci in the Normal Human Mouth. George C. Langford, Jr., John E. Faber, Jr., and Michael J. Pelczar, Jr. 349
A New Staining Technique for Polar Bodies. M. Wachstein and M. Pisano 357
The Utilization of Some Organic Compounds by One Strain Each of *Salmonella anatum*, *Salmonella oranienburg*, and *Salmonella pullorum*. Frank Davis and Mathilde Solowey 361
The Effect of 2,4-Dinitrophenol and Phage T2 on *Escherichia coli* B. Fred C. Heagy 367
The Stimulation of Gene Recombination in *Escherichia coli*. J. Bennett Clark, Felix

Haas, Wilson S. Stone, and Orville Wyss 375
Partial Purification and Resolution of Acetoacetic Decarboxylase. H. W. Seeley and P. J. VanDemark 381
Glucose Metabolism of *Clostridium perfringens*: Existence of a Metallo-Aldolase. R. C. Bard and I. C. Gunsalus 387
The Germicidal and Sporicidal Efficacy of Methyl Bromide for *Bacillus anthracis*. Robert W. Kolb and Roy Schneiter 401
Identification of the Koch-Weeks Bacillus (*Hemophilus aegyptius*). Margaret Pittman and Dorland J. Davis 413
Hemagglutination by the Koch-Weeks Bacillus (*Hemophilus aegyptius*). Dorland J. Davis, Margaret Pittman, and James J. Griffitts 427
A Method for the Determination of the Thermal Resistance of Bacterial Spores. Clarence F. Schmidt 433
A Biotin Function in Succinic Acid Decarboxylation by *Propionibacterium pentosaceum*. Notes:
Eugene A. Delwiche 439
The Use of Potassium Tellurite, Sodium Azide, and Acetic Acid in a Selective Medium for the Isolation of *Listeria monocytogenes*. M. L. Gray, H. J. Stafseth, and Frank Thorp, Jr. 443
A Motile *Lactobacillus* from the Cecal Feces of Turkeys. A. P. Harrison, Jr., and P. Arne Hansen 444
The Propagation of *Borrelia anserina* in Embryonated Eggs Employing the Yolk Sac Technique. D. G. McKercher 446

No. 4, APRIL, 1950

The Effect of Monochromatic Ultraviolet Radiation on the Infectivity and Hemagglutinating Ability of the Influenza Virus Type A Strain PR-8. Igor Tamm and Donald J. Fluke 449
Antisporulation Factors in Complex Organic Media. I. Growth and Sporulation Studies on *Bacillus larvae*. J. W. Foster, W. A. Hardwick, and Beverly Guirard 463
The Influence of Antibiotics and Sulfa Drugs on *Bacillus larvae*, Cause of American Foulbrood of the Honeybee, *in Vitro* and *in Vivo*. H. Katznelson 471
Yeasts from Hawaiian Fruit Flies: Their Identification and Ability to Produce Riboflavin. L. R. Hedrick and G. C. Burke 481
The Biological Degradation of Soluble Cellulose Derivatives and Its Relationship to the Mechanism of Cellulose Hydrolysis. Elwyn T. Reese, Ralph G. H. Siu, and Hillel S. Levinson 485
Acetic Acid Oxidation by *Escherichia coli* and *Aerobacter aerogenes*. Samuel J. Ajl 499
The Influence of Certain Salts, Amino Acids, Sugar, and Proteins on the Stability of Rickettsiae. Marianna R. Bovarnick, Judith C. Miller, and John C. Snyder 509
The Production of Streptocin by Different Strains of *Streptomyces griseus*. A. B. Kupferberg, H. Styles, H. O. Singher, and Selman A. Waksman 523
The Bacterial Oxidation of Aromatic Compounds. IV. Studies on the Mechanism of Enzymatic Degradation of Protocatechuic Acid. R. Y. Stanier 527
The Vitamin Requirements for Glycerol Oxidation by *Streptococcus faecalis*. P. J. VanDemark 533
Immunization with Heat-killed *Mycobacterium paratuberculosis* in Mineral Oil. II. Björn Sigurdsson and Anna G. Tryggvadóttir 541
A Comparative Study of Known Food-poisoning Staphylococci and Related Varieties. James B. Evans and C. F. Niven, Jr. 545
Chromatin Staining of Bacteria during Bacteriophage Infection. S. E. Luria and Mary L. Human 551
Electron and Light Microscopic Studies of Bacterial Nuclei. I. Adaptation of Cytological Processing to Electron Microscopy; Bacterial Nuclei as Vesicular Structures.

Stuart Mudd and Andrew G. Smith 561
Electron and Light Microscopic Studies of Bacterial Nuclei. II. An Improved Staining Technique for the Nuclear Chromatin of Bacterial Cells. Andrew G. Smith 575
Morphological Studies in the Genus *Nocardia*. II. Cytological Studies. Norvel M. McClung 589

No. 5, May, 1950

Cytological Changes in *Escherichia coli* Produced by Infection with Phage T2. R. G. E. Murray, D. H. Gillen, and F. C. Heagy 603
A Reaction of Bacterial Cells with Formaldehyde. Derrol Pennington 617
The Effective Concentrations of Penicillin *in Vitro* and *in Vivo* for Streptococci, Pneumococci, and *Treponema pallidum*. Harry Eagle, Ralph Fleischman, and Arlyne D. Musselman 625
The Action of Microorganisms on Fats. I. Oxygen Uptake by Bacteria in the Presence of Lipid Substrates. J. J. Jezeski, H. O. Halvorson, and H. Macy 645
The Metabolism of Glucose by *Ashbya gossypii*. M. N. Mickelson 659
The Chemotherapy of Experimental Tuberculosis. I. The *in Vitro* Activity of Thiosemicarbazides, Thiosemicarbazones, and Related Compounds. Richard Donovick, Felix Pansy, Gladys Stryker, and Jack Bernstein 667
The Chemotherapy of Experimental Tuberculosis. II. Thiosemicarbazones and Analogues in Experimental Tuberculosis in the Mouse. Dorothy Hamre, Jack Bernstein, and Richard Donovick 675
The Inhibition of Bacteriophagy by Bacterial and Nonbacterial Polysaccharides. Norman J. Ashenburg, Leslie A. Sandholzer, Henry W. Scherp, and George Packer Berry 681
A Urease Test for the Differentiation of *Brucella suis*. Genesio Pacheco and Milton Thiago de Mello 689
Studies on the Metabolism of Photosynthetic Bacteria. VI. Metabolism of Isopropanol by a New Strain of *Rhodopseudomonas gelatinosa*. Jack M. Siegel and Martin D. Kamen 693

No. 6, June, 1950

A New Bacterium (*Hemophilus piscium* n. sp.) from Ulcer Disease of Trout. S. F. Snieszko, P. J. Griffin, and S. B. Friddle 699
A Turbidimetric Method for the Assay of Antibiotics. Dwight A. Joslyn and Margaret Galbraith 711
The Physiological Characters of *Bacillus coagulans* (*Bacillus thermoacidurans*). Maurice E. Becker and Carl S. Pederson 717
Desoxyribosides and Vitamin B_{12} as Growth Factors for Lactic Acid Bacteria. Estelle Kitay, Walter S. McNutt, and Esmond E. Snell 727
The Mutation of *Pseudomonas putrefaciens* to Glucose Utilization and Its Enzymatic Basis. Harold P. Klein and Michael Doudoroff 739
Studies on the Disappearance of Folic Acid from Bacterial Cells. Herman C. Lichstein and John E. White 751
The Transformation of Typhoid Bacilli into L Forms under Various Conditions. L. Dienes, Howard J. Weinberger, and Sarabelle Madoff 755
The Properties of L Forms Isolated from *Salmonella* and the Isolation of L Forms from *Shigella*. Howard J. Weinberger, Sarabelle Madoff, and L. Dienes 765
The Nutrition of Brucellae: Utilization of Single Amino Acids for Growth. Philipp Gerhardt, L. A. Tucker, and J. B. Wilson 777
The Relation of Ion Antagonism to the Inorganic Nutrition of Lactic Acid Bacteria. Robert A. MacLeod and Esmond E. Snell 783
Index of Authors 793
Index of Subjects 795
